The GPS Speedometer

Veethree GPS Speedos Are Available in Black and White Premier

Veethree Instruments is proud to announce the release of its GPS speedometer to the marketplace. This instrument provides accurate speed readings, odometer and compass heading information all in one attractive package.

Two types of units are offered. One with heading and total mile odometer and another that includes two trip odometers that can be reset by adding a momentary switch on your dash attached to the wires exiting the back of the instrument.

In addition we offer a GPS receiver that will connect to other pulse type speedometers that you may already have. This receiver outputs 8 or 16 pulse signals to replace speed sensors that are currently on the market.

Release date of May 2011

HIGHLIGHTS

- Available in 120 MPH in Black and White Premier lines
- LCD display includes alpha heading (N, NW, W, etc.), Total odometer reading and on the unit with trip includes 2 remote resettable trip odometers
- Our GPS receiver updates 10 times per second. Unit sold separately.
- Speed accuracy of +/- 1 MPH (once moving)
- Custom OEM styles and ranges available.
- Contact your sales representative for details.
- Easy to install.
- Matches other Veethree instruments.
